CYBER SECURITY

Human Error is the Leading Cause of Information Security Breaches

It is estmated that up to 80% of IT security problems are caused by people.

Don't fall for email phishing!

Be suspicious of ….

- Emails that come from unknown sources
- Mails with **very poorly grammer** and bad spellings
- Hyperlinks to fake websites
- Generic subject lines... "hello there"
- "Urgent" requests or threats
- Emails containing any attachments

"Think Before You Click"

if in doubt, **DO NOT CLICK.**
